Hi Carissa,

The Signatory for D.C. DDOT, John Stokes is having issues requesting access for 4 **approved** permits (list below). Note, these permits were renewals. He keeps getting error message: "Permit ID not available for reporting I net DMR". Can you please advise?

Screenshots of active permits and error message are attached.

Hi Kristen,

You are correct, there is a TMDL for pH and I don't have any reason to believe monitoring for pH is necessary for your facility at this time. However, monitoring for pH will be required for indicator monitoring. I will see to it that the impaired waters monitoring for pH is removed.

Thanks for letting us know.

Regards,  
Carissa
